

CARRIERS AND FLUSH PLATES

Water, as future.

From Portugal to the world

OLI is the biggest manufacturer of flushing carriers in South Europe and partner to the leading worldwide players of ceramic sanitary ware.

The company was founded in Aveiro in 1954, in the center region of Portugal. From its large and modern industrial manufacturing plant, recognized for its productive efficiency, OLI exports 80% of its production to over 80 countries in five continents. Today, OLI is a global brand that can be found in bathrooms all over the world. From a luxurious hotel in Dubai to a modern hospital in Israel, from the new football stadium in Qatar to tourist restaurants in Italy. OLI also relies on the customization of its bathroom solutions to meet the needs of each market, as well as to obtain varied international certifications to authenticate the quality and safety of its products in the regions in which it is present.

Innovation in the brand DNA

- The OLI factory never sleeps. Daily, its R&D Center studies new water-efficient solutions for a comfortable and inclusive bathroom. Innovation defines its DNA as its signature, "Inspired by Water", expresses OLI's mission to place innovation at the service of water preservation with the goal of defending this scarce natural resource in which life on this planet depends on. The dual flush mechanism (1994), which contributed to the reduction of 50% of water usage, was its first breakthrough project. The mass production of this water-saving solution brought tremendous environmental and economic benefits at a world scale. This invention has been accompanied by various simple solutions that have revolutionized our perception and experience of bathroom spaces.

Design and author identity

- From inlet valves that assure a quick and silent filling of the tank, to resistant frame structures that allow the user to adjust the height of the toilet, to the flush plates designed by world-renowned architects, OLI has built a valuable portfolio, where innovative carriers assume a central role. By utilizing patented technology and maintaining high manufacturing standards, the brand offers products suitable for new construction, rehabilitation and renovation projects. These products are distinguished by their contemporary design, use of high-quality materials and functional features. In recent years OLI has strengthened its ties and invested in architectural projects, establishing new partnerships with renowned figures such as Álvaro Siza Viera (Pritzker Award 1992), Eduardo Souto de Moura (Pritzker Award 2011), Romano Aldolini, and Alessio Pinto, all of whom have earned top accolades in the design field. OLI is one of the Portuguese companies with the most patents registered in Europe: currently holding 38 active patents. This strategy of creating value and of concentration on the culture of knowledge and innovation, has been recognised with many awards - Millennium Horizontes, Archiproducts Design Award, Good Design, Iconic Awards, Design Plus, Red Dot Design Award, IF Design, KBB and DPHA, OLI thus fulfills its vision: to be a company of excellence recognized for innovation and the creation of value for all.

Water, as future.

Water, this gift that hydrates us and irrigates the fields that provide us with nourishment. This sea in which we navigate, this rain that holds the world in balance. What future awaits it? What future awaits us?

“Water, as the future.” is more than a statement, it is a belief in responding to the threat that involves water. This is what drives us at OLI every day. Contributing to saving water, the efficiency of its use, the sustainability of its origin and the respect for this element at every moment of its use. It is recognizing that there is a learning process to be undertaken and that this is the time for it.

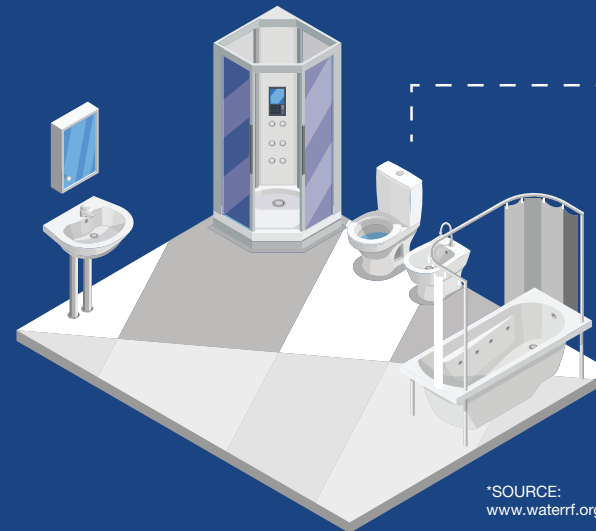

We are concerned just as we are motivated by the knowledge that throughout our history we have contributed towards more responsible and sustainable water consumption. Flushing with reduced water consumption and making more efficient use of water in the bathroom are integral to OLI’s principles, and this also contributes to our future.

70%*

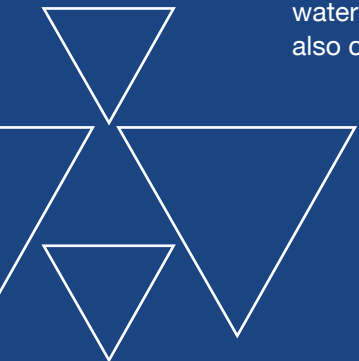

of water consumption in a house takes place in the bathroom

24%*

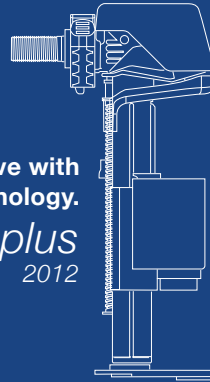

of water consumption in the bathroom takes place in flushing

water / day

*The Plus inlet valve saves up to 9 litres of water per day, corresponding to a 12% reduction in the water consumption, based on average usage in a single-family home for 4 people with cisterns without the Plus inlet valve.

PROJECTS WORLDWIDE

BNP PARIBAS FORTIS - BRUSSELS

The new headquarters of BNP Paribas Fortis bank in Brussels, is an “architectural jewel” and passive building that meets the highest standards of innovation and environmental performance.

Located in Warandeberg, in the heart of the Belgian capital, the building has a floor area of more than 100,000 square metres and houses 4,100 workplaces, making it one of the largest office buildings in Belgium.

The bathrooms of this building were equipped with **OLI120 PLUS SANITARBLOCK** in-wall carriers and **SLIM Soft-touch black** flush plates.

KATARA TOWERS: DOHA - QATAR

Katara Towers are a new icon in Qatar. Symbolically intertwined with Qatar’s heritage, the Iconic Towers in Lusail are an architectural translation of Qatar’s national seal, representing the traditional scimitar swords.

In these two towers, which house two hotels, we can find the **OLI74 PLUS Sanitarblock** in-wall carriers as well as the **SLIM Polished Gold** and **OCEANIA MIA** flush plates.

PROJECTS WORLDWIDE

IBEROSTAR MIRAFLORES HOTEL - PERU

The Iberostar Miraflores Hotel, in Lima - Peru, is the first single-use plastic-free hotel. Promoting the circular economy is one of the purposes of this 5-star hotel that presents us with an inspiring design and offers a warm and welcoming atmosphere, without giving up the avant-garde style of the new construction.

Keeping the bet on sustainability, they chose **OLI74 PLUS SANITARBLOCK** in-wall carriers with **GLOBE Black Soft-touch** flush plates for their bathroom spaces.

DU MUSÉE - CANADA

Du Musée is an elegant enclave that blends historical Victorian trimmings with modern sensibilities, on a quiet street dotted with breathtaking sculptures and installations. To equip the bathrooms of the townhouses and condominiums, were chosen the **OLI74 PLUS** and a few different flush plates, the **SLIM** model being the most requested.

OLI In-Wall Carrier Advantages

Universal Installation

- Fits all Toilet models
- 3.54" (90mm) Minimum thickness

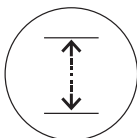

For 2 x 4 and 2 x 6 installation

Depth adjustable outlet bend

Polypropylene outlet bend, that connects the toilet to the waste pipe, rotates 45° and also adjusts in depth to match the construction site waste pipe. Adapts easily to 2 x 6 stud wall constructions

Height adjustable for optimal comfort

5.9" (150mm) adjustment

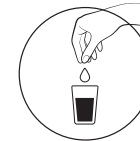

Silent Inlet Valve

- Class 1 Certified

Azor Plus Water Saving Delay System

This is a system created by OLI in which the inlet valve delays the inflow of water into the tank to prevent extra water being used for flushing. While flushing takes place, no new water enters the tank.

Frame ultra resistant to corrosion

Frame tested for a 400kg load (882 lbs)

Easy Clean

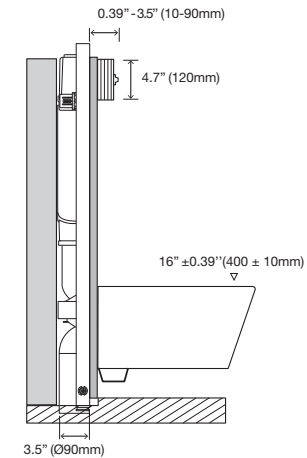

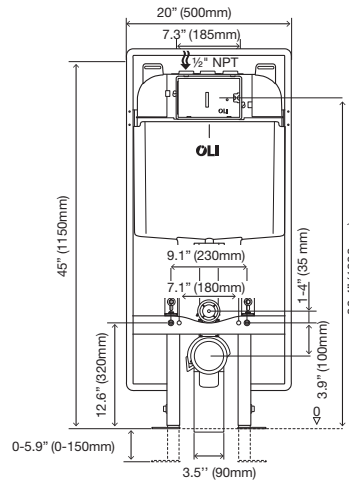

The In-wall carrier installation allows easy access around the toilet area.

RIA START STOP

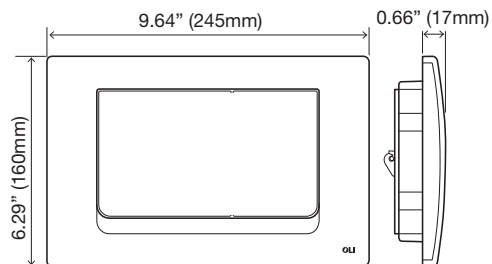

Start and stop the flush at your convenience or let the flush finish its cycle.

FEATURES

- ABS: high resistance to scratches;
- Mechanical actuation;
- Actuation force < 20 N.

Features and
Installation

PNEUMATIC FLUSH PLATES

Products marked with  comply with the American Disability Act (ADA) when installed per the requirements of the latest Ada Act Accessibility guidelines (ADA AG) and/or ICC/ANSI A117.1.

PNEUMATIC FLUSH PLATES

Pneumatic flush plates are known for their soft press actuation, but they can also be used for alternate installations of up to 2 meters away from the carrier, optimizing your comfort.

TRUMPET

Designed by **Architect Siza Vieira**

FEATURES

- Stainless steel material;
- Pneumatic actuation;
- Actuation force <20N;
- PVD Finish;
- Pneumatic conversion kit included.

Features and Installation

The Trumpet flush plate is the perfect combination of elegance and harmony, both characteristics of a trumpet. In 2016, the Trumpet was selected Best of Category for the Archiproducts Design Awards one of the most prestigious awards of Architecture and Design worldwide.

"I am very pleased with the prestigious "Best of Category 2016" award for the Trumpet flush plate. The quality achieved is due to the competent and committed contribution of the technicians at OLI. It was a pleasure to evolve the design of the flush plate with them."

ACCESSORIES

216252
Kit Duplex

\$ 175.00

KIT DUPLEX

- 2 points of actuation on the same carrier;
- Only for pneumatic flush plates;
- Single flush.

885233

Bypass connector

\$ 345.00

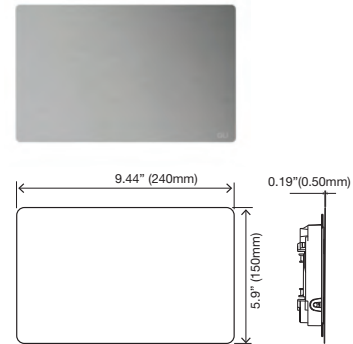

BYPASS CONNECTOR

- Connector between the flush pipe and the outlet bend;
- The flushing can be tested before the toilet is installed.

880390

Decorative inspection plate brushed stainless steel

\$ 270.00

SEAMLESS INSPECTION PLATE

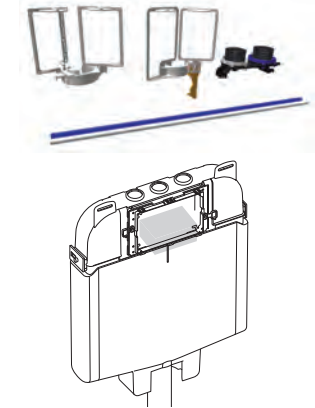

- Customize with any wall finish;
- Inspection plate;
- Stainless steel material;
- Compatible with pneumatic in-wall carriers;
- Vandal resistant;
- 0.5mm thick.

601527

Pneumatic Kit Oli74 Plus

\$ 120.00

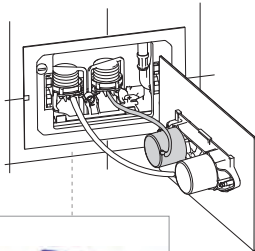

PNEUMATIC KIT FOR OLI74 PLUS

- 2 pneumatic pipes with 13.75" (350mm) of tubing;
- Outlet valve pneumatic anchors;
- Pneumatic bellows.

043234
Pneumatic Pipes

\$25.00

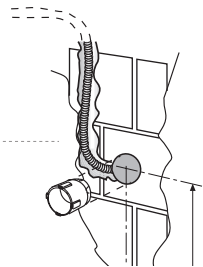

PNEUMATIC PIPES

- Pneumatic pipes x2;
- 118" (3m) each.

049544
Protection Pipe

\$25.00

PROTECTION PIPE

- Protection pipe 71" (1.8m) pneumatic connections.

FOR FLOOR TOILETS WITH TANKS

878735

FILL VALVE IVC102 PLUS 15/16

\$25.00

FILL VALVE IVC102 PLUS 15/16

- Quick filling;
- UPC Certified;
- Bottom inlet valve with 1/2" brass, plastic or 15/16" in plastic connection;
- Delayed refilling inlet valve: it starts after the outlet valve is in the close position;
- Height adjustable;
- Silent inlet valve, class I;
- Integrated filter can be cleaned;
- Counter pressure closing system (hydraulic);
- Dynamic pressure functioning range: 0.5-6bar;
- Maximum static pressure: 16bar;
- Anti-backflow function.

Warranty Terms

1. WARRANTY PERIODS for OLI products:
 - a) In-wall flushing carriers - 10 (ten) years;
 - b) Flushing mechanisms (taps and valves) – 10 (ten) years;
 - c) Push plates and push buttons – 10 (ten) years;
 - d) Fixtures, and fast-wearing parts, specifically rubber seals or similar products – 2 (two) years;
 - e) All other products – 2 (two) years;
2. The warranty period starts on the purchase date by the first final Consumer. The sales document, corroborating the sales date of the OLI product and the respective serial number, certifies the start date of the warranty. In the event of a subsequent purchase, or any alteration in proprietorship or user, the warranty period shall continue for the remainder the warranty period and shall continue unaltered relative to all other aspects of the warranty.
3. This warranty is also applicable to subsequent substitution parts for those determined to be defective until the end of the warranty period for the product of which they are a part, or up to two years after their application if the remaining warranty period for the product is less than two years. The repair or substitution of a product or a part does not renew the initial warranty period.
4. This warranty is only valid if the product has been correctly installed, in accordance with the installation instructions and the information contained in the catalogues and manuals provided by OLI. In situations where information is not covered in the aforementioned resources, installation should be carried out in accordance with the standards, rules and technical specifications contained in the legislation in effect, applicable to the type of devices and mechanisms in question.
5. The applicability of this warranty also depends on the use considered to be normal for the products, the operating conditions (ex. pressure, temperature, etc.) and the type of liquid used, which should have values within the parameters indicated in the catalogues or manuals provided by OLI.
6. The flush pipes are used for other liquids other than network water. Therefore, the standards relative to the resistance of polyethylene (PE), polypropylene (PP) and polyvinyl chloride (PVC) should always be respected.
7. Products with missing parts or which are defective at the time of installation, as well as during pressure tests, should not be used.
8. OLI products should not be used with other products which do not have local national Quality Approvals/Certificates.
9. Warranty claim should be accompanied by a copy of the sales receipt.
10. This warranty is immediately terminated and is not extended to any equipment or part that has been damaged or become inoperative as a result of the following:
 - a) Accident, fall, fire, flooding and inappropriate, abusive or negligent use;
 - b) Use of parts or accessories which have not been manufactured or provided by OLI, or whose provision and/or manufacture have not been expressly authorised by OLI;
 - c) Unauthorised alterations to the equipment;
 - d) Breaking of any warranty seal or removal of any label with the serial number or legally mandatory marking;
 - e) Assistance, repairs or substitutions carried out by third parties other than OLI, an authorised reseller or certified technical centre.
11. Under no circumstances does the warranty cover the product's installation.
12. The products are packaged in duly identified packages which fulfil the requirements established in applicable national legislation. OLI cannot be held responsible for material or personal damage resulting from the incorrect or inappropriate use of the packages.
13. Failure to comply with any of the aforementioned clauses releases OLI from responsibilities pertaining to material damage and/or non-material damage which may result.
14. OLI recommends that the packaging materials of its products, after no longer being needed, should be recycled by the appropriate and socially responsible means and processes.
15. In the case of defects or non-conformity of OLI products, a written notification should be sent to the dealer where the product was originally purchased within 60 days of becoming aware of the defect, as long as it was not previously visible, within reason. The appropriate measure shall then be taken to determine the possible defects detected. The notification may also occur by telephone, followed by a written notification to the dealer.

16. Failure to comply with the terms of the aforementioned number may result in the total or partial loss of the right to compensation or of the warranty itself.
17. The notification mentioned in Point 15 of this Warranty should contain the following information:
 - a) Name, address and telephone number of the claimant;
 - b) Identification of the product;
 - c) Entity and place where the product was acquired, as well as the respective purchase date;
 - d) Address of the location where the product was installed;
 - e) Description of the visible losses;
 - f) Type of installation and the materials used (if the claimant has this information);
 - g) Conditions of use, ex. type of system, pressure, temperature, etc. (if the claimant has this information);
 - h) Name, address and telephone number of the company or person who installed the product.
18. Any personal information provided shall be used solely for processing the claim and for contact with the claimant and may be transmitted to the insurance provider to which civil responsibility for damages has been transferred.
19. Any obligation to repair, substitute, reduce the price or reimburse, if this should be the case, shall occur only for OLI products which have a visible marking or identifying logotype, with defects or non-conformities which have been proved through extensive technical verification. If it is concluded that the product is not defective, the expenses paid by OLI shall be invoiced to the claimant. The product's technical standards at the time of its manufacture shall be the basis for its conformity assessment.
20. OLI cannot be directly held responsible by the purchaser if the product's non-conformity results from actions by the resellers (or other commercial agents) of OLI products, namely when non-conformity results from statements made by the sales representative regarding the product, its qualities and use conditions, which are different from the product's indications and instructions, including the information contained in manuals and instruction guides provided with the products or published on the company's website.
21. The consumer's rights and obligations are established according to the local Legal Regime for the Sale and Warranty of Consumer Goods.
22. Any litigation resulting from the terms or interpretation of the present warranty, or of the purchase and sales contract from which the warranty results, is regulated by the local law and resolved in the court of the competent legal jurisdiction where the headquarters of the distributor are located, with express waiver of any other, except in cases where OLI and the beneficiary of the warranty have agreed to settle the litigation in an arbitration court.
23. This warranty binds OLI according to its exact terms, except typographical errors.
